You need:

- 1- 6" x 6" heavyweight patterned paper (Rose Red Prints Series)
 - 1 - 4" x 4" brushed gold cardstock
 - 1 - 2 1/2" x 11" brushed gold cardstock
 - 1 - 1" x 11" brushed gold cardstock
 - 2 - 3/4" x 11" brushed gold cardstock
 - 1 - 1/2" x 11" brushed gold cardstock
 - 1 - 2" x 2" white cardstock
 - 2 - 2" x 2" brushed gold cardstock
 - 1 - 2" x 2" Rose Red cardstock
- Miscellaneous pieces brushed gold cardstock for die cutting

- Tagger's Dozen stamps
- Designer Label punch
- 3/4", 1", & 1 1/8" circle punches
- 3/4" square punch
- gold pony bead
- Fire circle and square rhinestone brads
- gold brads
- Rose Red ink pad
- Circle scissor or Coluzzle
- Marker the same color (Rose Red) as the patterned paper
- Scissors
- Red line tape (Sticky Strip or Tacky Tape)
- Embossing stylus
- Paper piercing tool
- Die cut machine

Lid

Use template (A) to make horizontal and vertical folds on patterned paper. Using a marker the same color as the paper, draw a line over the horizontal and vertical folds on the back side of the paper. Fold diagonal lines from corner to corner, then make secondary diagonal lines by folding each corner to the center of the opposite side of the square. Center Circle Scissor over the intersection of the drawn lines and draw a circle 3 1/2" (#92) in diameter using the marker. Then using the Circle Scissor, cut a 4 3/8" circle (#112). Using scissors, cut on each fold line from the edge to the drawn circle all the way around the circle.

Punch a 3/4" out of a scrap of gold cardstock. Stacking a large circle Fire rhinestone brad through pony bead, punch a hole with a paper piercer through the center of the patterned paper and through the center of the punched piece. Insert the brad with pony bead through the top of the patterned paper piece and through the gold circle and spread ends out to secure.

Run a line of red line tape along one long edge of one 3/4" x 11" gold cardstock. Carefully fold patterned paper into peaks, adhering gold cardstock right at valley point and making sure that the tabs are folded almost to the fold line on the next section. If you don't fold enough, there will not be enough to go around, if you fold too much your lid will end up being too small. The ends of the gold strip should end up overlapping by 7/8" for the right size.

Using regular adhesive, adhere the 1/2" x 11" piece of gold cardstock inside the lid, covering the edges of the patterned cardstock and lining about about 1/8" from the bottom edge of the lid.

Bottom

Center circle scissor over 4" x 4" brushed gold cardstock. Using embossing stylus, emboss a 3 1/4" circle (#82) on cardstock, then cut a 4" circle around that (#102). Cut small tabs (roughly 1/4") from edge of circle to embossed line all the way around the circle. Bend all tabs in.

Using 3/4" square punch, take 2 1/2" x 11" gold cardstock and punch triangles along one long edge by lining up edge of cardstock from corner to corner of window of punch (turn punch upside down.) Run a line of red line tape on bottom edge of this piece and adhere to tabs of circle piece, ending with overlap of 1/4". Use red line tape to adhere ends at overlap.

Using regular adhesive, adhere the remaining 3/4" x 11" piece gold cardstock to the inside of the box bottom with the bottom edge covering the tabs from the bottom piece.

Score 1" x 11" gold cardstock at 1/2" mark, mark off 3/4" increments starting from one short side. Punch holes in center of marked side at each mark, put brads through holes to decorate. Fold in half, use red line tape to adhere to bottom of crown with fold line uppermost, also use red line tape to adhere two folded halves together. There is no overlap, edges will abut each other.

Stamp "Queen for a Day" using Rose Red ink on white cardstock, punch out with 1" circle punch. Punch a piece of gold cardstock with 1 1/8" circle punch, adhere white circle to gold circle. Punch Rose Red cardstock using Designer Label punch. Punch holes on each side for brads. Adhere Queen circle in center. Center label in front of crown, use paper piercer to make holes for brads through punched holes, place gold brads through holes, adhere to crown.

Decorate sides of crown with die cut pieces if desired. Place lid in box...the bottom of the lid should rest on top of the 3/4" strip adhered to the inside.
