

The bride card is my personal design. The bodice is stamped with the heart stamp from Daisy crazy on US Vanilla using Versamark, embossed with Detail White Embossing Powder, then cut out. The skirt is cut out of US White. The torso is cut from Blush Blossom.

The card base was made from Mauve Mist, with an Almost Amethyst panel layered on top (4.0" x 5.25"). Tulle is wrapped and gathered around the skirt piece which is adhered on top of the Almost Amethyst panel. The torso is adhered to the top of the card, with a small strand of pearl beads attached behind the Almost Amethyst panel to make the necklace. Roll a glue dot as small as you can and use that to stick the necklace to the chest.

Adhere the bodice over the torso and skirt, hiding the ugly underpinnings! Then make a circle from US White (approx 2" in diameter) with the scallop scissors and stamp the small flower from Daisy Crazy many times in the center with Almost Amethyst, Mauve Mist, and Blush Blossom inks. Punch a hole in each scallop with the 1/8" hole punch. Put a piece of narrow pink organdy ribbon so that both ends protrude from one side, adhere over the hands and the tip of the bodice bottom so that the ribbon "hangs" from the bottom.

Stamp "For the Bride" from Mini Mates in Basic Black on a 1" x 1.25" piece of Mauve Mist; adhere to the lower right corner.

Tulle is extremely hard to work with and you will have to experiment with your adhesives to find out what will stick to it. Mini glue dots seem to do the best job, since then will mush through the tiny holes and stick to the layer beneath...somewhat! Chances are, if you have this card on display, that you will have to repair it often...it's maddening! It did make it easier for me to take it apart to make the template though.

I give you permission to recreate this card yourself, as long as you credit me for the design! It was inspired by the I Love Lucy show. The intro shows a heart that is very obviously a woman's bodice and I just took it from there! Enjoy!
